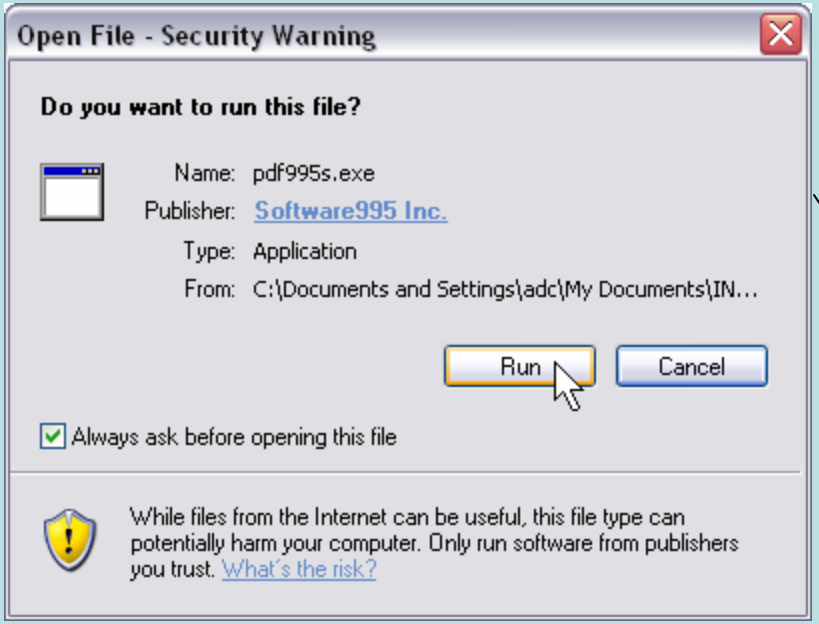
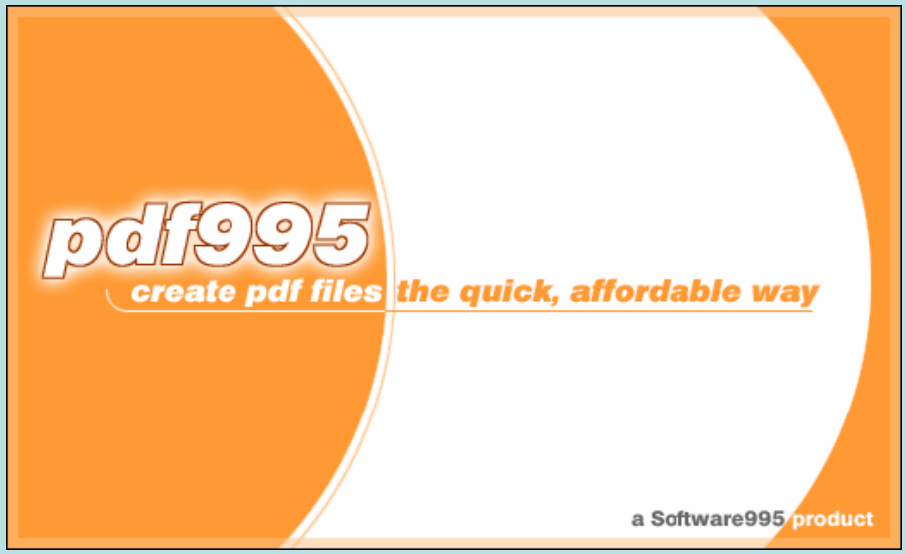
After downloading, go to the downloaded files on your hard drive and double-click them to install each, starting with pdf995s.exe.

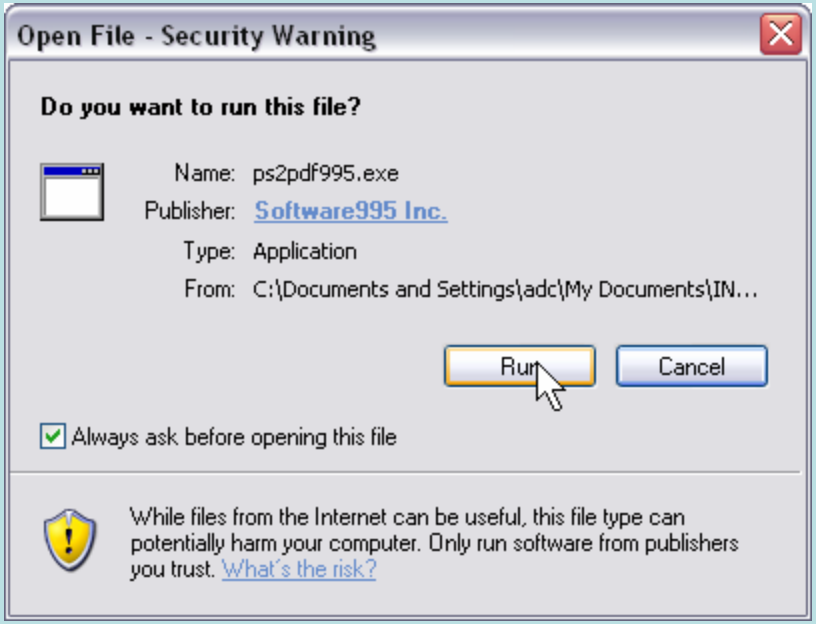
Note: If you do not see the ".exe" extension do not worry, the files will still install. The extensions are simply hidden.

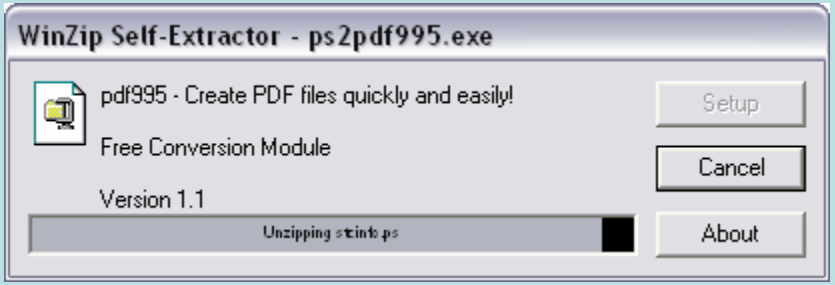
See next page.





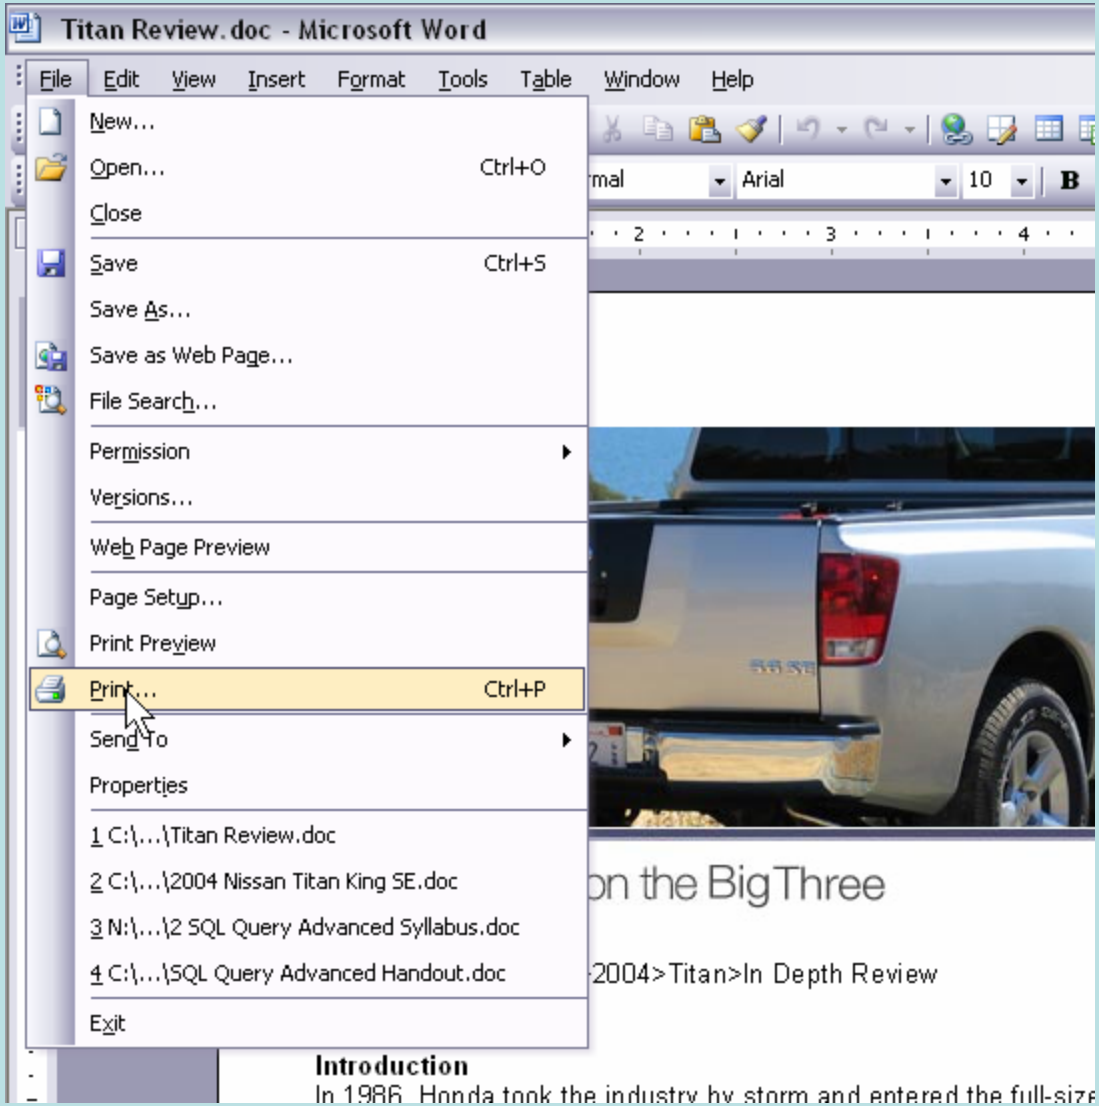
When this component is finished installing a browser will open with additional instructions or information about the product. It will recommend you download the second piece but you will have already done that so feel free to close the browser.



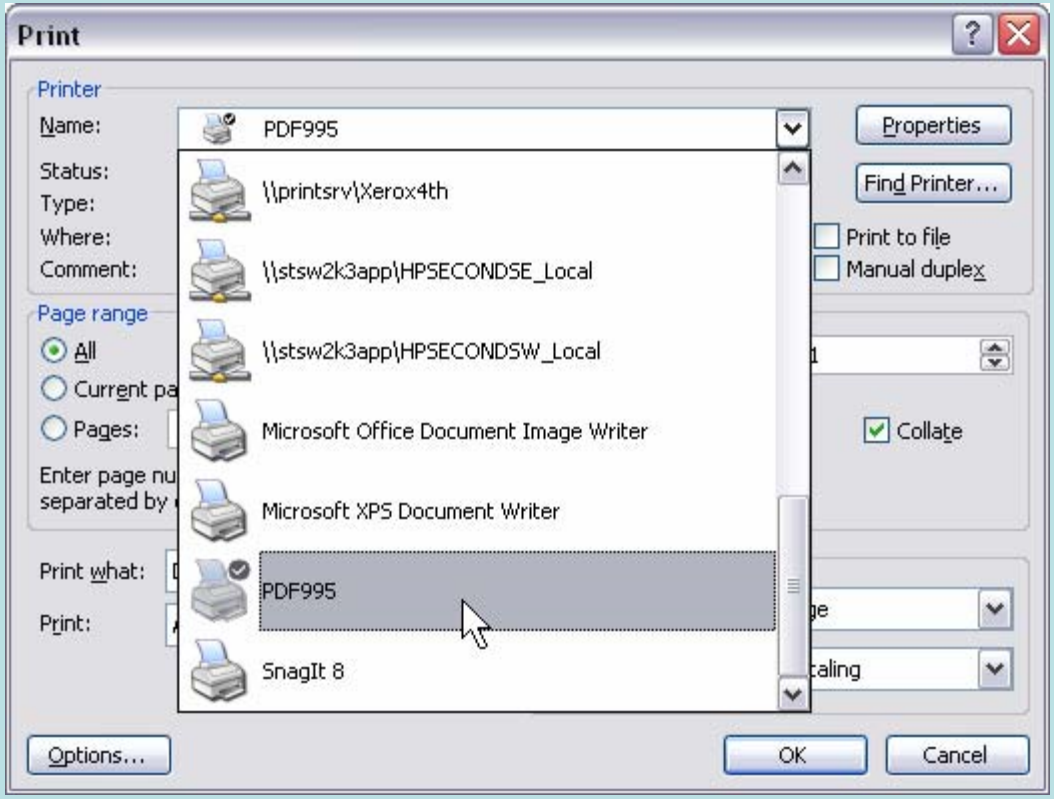


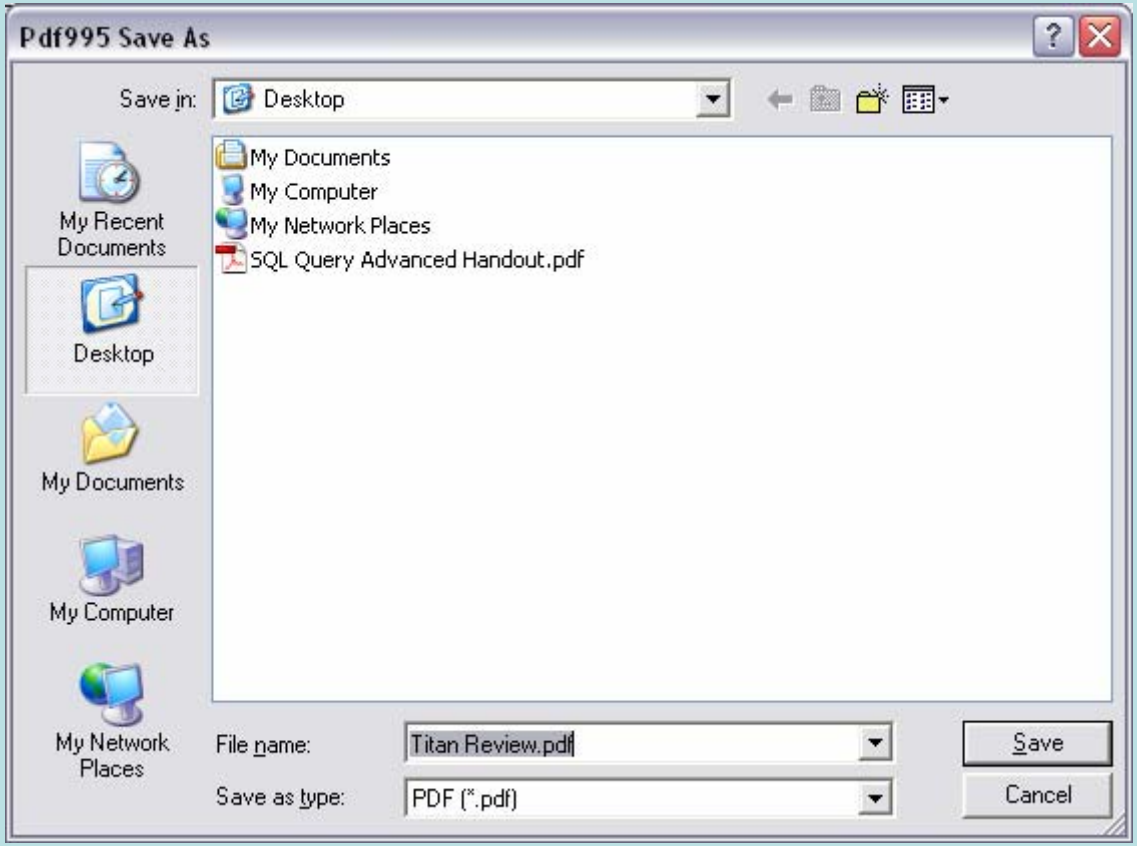
When this component is finished installing a browser will open with additional instructions or information about the product. It will recommend you download additional components but you will have already downloaded what you need so feel free to close the browser.

To create a PDF choose “File – Print” from the menu bar in our application.



Be sure to choose the PDF995 printer from you list of printers.





Choose a location and file name. If you create your own, be sure to leave the ".pdf" extension. Then click save.
